Play equipment for life

# Design meets Durability. Cubiron.

Cubiron is the latest innovation from Berliner Seilfabrik in the area of rope play equipment with spatial nets and combines futuristic design with maximum play value. The outer frame made of steel not only ensures highest stability and maximum durability, but gives the new play sculpture its industrial and modern appearance, suitable for every environment.

The spatial net inside Cubiron - a classic feature of playground design - offers children plenty of fun and developmental possibilities when climbing by promoting psychomotor skills and three-dimensional imagination.

The tensioning system is encapsulated inside the steel connectors. All sharp-edged and technical connection elements have been banned from the play area in order to ensure the children's safety during free play on Cubiron. Of course, the net can be tensioned particularly easily and evenly. Cubiron is available in two different sizes.
